If you find any problem in viewing the powerpoint, or if the fonts do not read properly, in order to enjoy the power point to its full extent, here are a few tips…

Install the fonts

How to install the fonts

1. Go to start button which you will see at the bottom of the left side of your computer/laptop and click it.
2. Click the Control Panel.
3. Once the Control Panel is opened, you will see a folder called “Fonts” or “Appearance and Personalization.”
4. If your computer shows “Appearance and Personalization” folder, click it.
5. Now you will see a folder called “Fonts.”
6. Click Open the Fonts.
7. Come back to your CD.
8. There is a folder called Fonts in it.
9. Click open the folder.
10. Keep your cursor on the screen and press “CTRL+A”together.
11. Then again press “CTRL+C” together.
12. Come back to the “Fonts” folder in your computer and press “CTRL+Z” together.
13. Now you can close the “CONTROL PANEL” and open the Power Point Presentation again and view.
